FOR IMMEDIATE RELEASE

VECTECH PHARMACEUTICAL CONSULTANTS, INC. PATENTED AIRFLOW DESIGNED HEPA MOBILE STORAGE CARTS ARE BUILT FOR EFFORTLESS HEPA FILTER CERTIFICATION AND REPLACEMENT

Farmington Hills, MI –June 2, 2007—With the requirement of the FDA's "Guidance of Industry , Sterile Drug Products Produced by Aseptic Processing, current Good Manufacturing Practice" document stating that all unsealed containers in aseptic processes remain in Class 100, ISO equivalent areas, ***Vectech Pharmaceutical Consultants, Inc.*** has designed HEPA Mobile Storage Carts with patented airflow design that meet Class 100 conditions. These mobile storage carts grant the freedom to move your product safely without expensive facility modifications and come in standard sizes or can be custom-designed to meet your size, application or specific product need.

- Class 100 environment continuously maintained
- Patented Horizontal Laminar Flow design for greater effectiveness
- Large storage area
- Easy to load, use and clean
- Low maintenance with access to all components
- Standard units sized to pass through standard 3' x 7' door openings
- Carts are constructed of stainless steel and equipped with urethane casters for easy and safe maneuvering
- Horizontal unidirectional airflow across product storage area
- Unit can be operated continuously by standard 120-volt power by the use of an integrated cord and reel system or stand alone for up to 4 hours of operation by means of onboard batteries
- Standard unit supports up to 14 cubic feet of storage space divided into multiple shelves
- Factory Tested to High Performance Standards
